

Besat Specialty and Subspecialty Hospital

International Patients Department

Islamic Republic of Iran has been recognized as one of the leading countries in developing medical sciences in the world. Moreover, tourist attractions such as natural, hot springs, and holy places have attracted many tourists annually to Iran.

Besat specialty and subspecialty hospital of Sanandaj has successfully received official and international certificates of global medical standards. Therefore, patients can trust Besat hospital to get medical and surgical services. They can enjoy the nature and landmarks of Sanandaj while receiving treatment services, either.

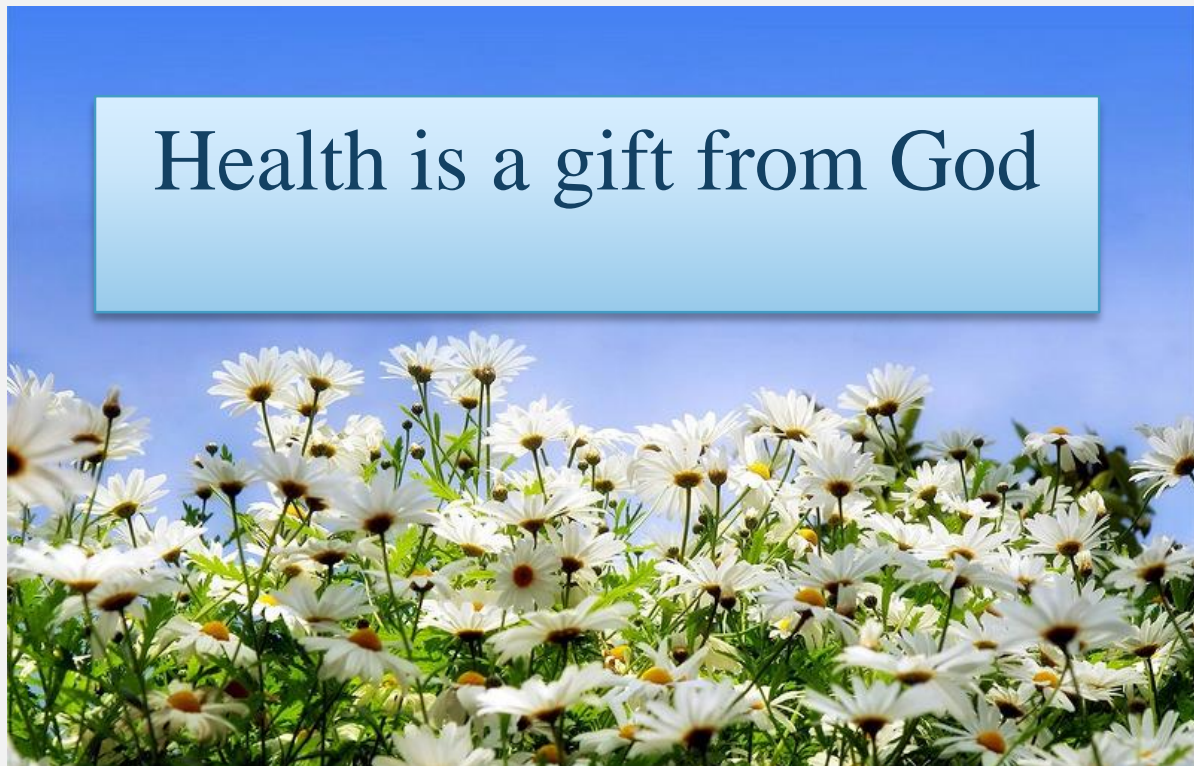

- The IPD expert of Besat hospital is ready to respond your questions and give you information about the available services for international patients.

The IPD expert of the hospital helps you in the process of admission in order to facilitate registering, collecting, and summarizing medical history and information of international patients in the hospital's information systems. Then, international patients and their companions are introduced to VIP rooms.

After the treatment program is completed, patients are educated to receive sufficient information so that rehabilitation is facilitated. International patients can follow their treatment program in their home country.

Costs are calculated and patients can see the list of medical services costs after the treatment process is completed.

You can click on “costs” for further information.

We are committed to deliver quality health services
